```

OUTPUT:

EXPLANATION:

HTML tags

| Tag | Explanation |
|----------|---|
| <html> | Root element that contains the entire webpage. |
| <head> | Stores metadata, stylesheets, fonts, and page settings. |
| <title> | Sets the browser tab title. |
| <link> | Connects external resources like fonts and favicon. |
| <style> | Contains internal CSS styling. |
| <body> | Contains all visible webpage content. |
| <nav> | Creates the sidebar navigation section. |
| <main> | Represents the primary content area of the page. |
| <div> | Generic container used for grouping elements. |
| <button> | Creates clickable buttons for controls and navigation. |
| <input> | Accepts user input such as search text. |
| | Displays small inline text content. |
| | Displays images or album artwork. |
| <svg> | Creates scalable vector icons. |
| <path> | Defines shapes inside SVG icons. |
| <h2> | Displays section headings. |
| <a> | Creates hyperlinks and navigation links. |
| <p> | Displays paragraph text. |

CSS Properties

| Property | Explanation |
|-----------------------|---|
| background | Sets the background color or image. |
| color | Sets text color. |
| width | Defines element width. |
| height | Defines element height. |
| display | Specifies how an element is displayed. |
| flex-direction | Defines the direction of flex items. |
| justify-content | Aligns items horizontally. |
| align-items | Aligns items vertically. |
| grid-template-columns | Defines grid column structure. |
| grid-template-rows | Defines grid row structure. |
| grid-area | Assigns an element to a grid area. |
| padding | Adds inner spacing inside elements. |
| margin | Adds outer spacing around elements. |
| gap | Creates spacing between grid or flex items. |
| border | Adds borders around elements. |
| border-radius | Creates rounded corners. |
| overflow | Controls content overflow behavior. |
| cursor | Changes mouse cursor appearance. |
| position | Determines element positioning method. |
| top | Sets distance from the top. |
| bottom | Sets distance from the bottom. |
| left | Sets distance from the left. |

| Property | Explanation |
|-----------------|---|
| right | Sets distance from the right. |
| z-index | Controls stacking order of elements. |
| font-size | Sets text size. |
| font-weight | Sets text thickness. |
| font-family | Specifies font style. |
| text-align | Aligns text horizontally. |
| text-decoration | Adds decorations like underline. |
| opacity | Controls transparency level. |
| box-shadow | Adds shadow effects around elements. |
| transition | Creates smooth animations between states. |
| transform | Applies movement, scaling, or rotation. |
| object-fit | Controls image fitting inside containers. |
| aspect-ratio | Maintains proportional width and height. |
| white-space | Controls text wrapping behavior. |
| scrollbar-width | Defines scrollbar thickness. |
| backdrop-filter | Applies blur effects behind elements. |

CSS Pseudo Classes

| Pseudo Class | Explanation |
|---------------------|---|
| :hover | Applies styles when mouse hovers. |
| :focus-within | Applies styles when child element is focused. |
| ::before | Inserts content before an element. |
| ::after | Inserts content after an element. |
| ::-webkit-scrollbar | Customizes scrollbar appearance. |

CSS Variables

| Variable | Explanation |
|--|-------------------------------|
| <code>--bg-base</code> | Main background color. |
| <code>--bg-highlight</code> | Hover background color. |
| <code>--text-base</code> | Primary text color. |
| <code>--text-subdued</code> | Secondary text color. |
| <code>--essential-bright-accent</code> | Spotify green accent color. |
| <code>--sidebar-width</code> | Sidebar width setting. |
| <code>--top-bar-height</code> | Height of top navigation bar. |
| <code>--now-playing-bar-height</code> | Height of music player bar. |

JavaScript Elements & Patterns

| Element / Pattern | What it does in this code |
|--|--|
| <code>const tracks = [...]</code> | Array of 11 track objects, each with title, artist, duration(seconds), and gradient color. |
| <code>let playing, let elapsed, let shuffleOn, etc.</code> | State variables tracking current playback status, position, and toggle states. |
| <code>let liked = new Set()</code> | A Set storing indices of liked tracks — no duplicates, $O(1)$ lookup. |
| <code>document.getElementById()</code> | Grabs specific elements by ID — <code>playBtn</code> , <code>progressBar</code> , <code>progressFill</code> . |
| <code>document.querySelector()</code> | Selects the first matching element by CSS selector — used for single elements like <code>.np-bar-song</code> . |
| <code>document.querySelectorAll()</code> | Returns a <code>NodeList</code> of all matching elements — used to attach events to all cards, pills, buttons. |

| Element / Pattern | What it does in this code |
|---|---|
| <code>.forEach()</code> | Iterates NodeLists to attach click handlers to every card, pill, sidebar item, etc. |
| <code>addEventListener('click', ...)</code> | Attaches click handlers to play buttons, pills, cards, nav icons, progress bar, volume bar. |
| <code>addEventListener('mousedown', ...)</code> | Starts drag tracking on the progress bar and volume slider. |
| <code>addEventListener('mousemove', ...)</code> | Continuously updates seek position or volume while the mouse is held down. |
| <code>addEventListener('mouseup', ...)</code> | Ends drag mode for both the progress bar and volume slider. |
| <code>addEventListener('keydown', ...)</code> | Listens for Enter key in the search bar to trigger a search toast. |
| <code>addEventListener('scroll', ...)</code> | Tracks scroll position in <main> to build a back/forward navigation history. |
| <code>setInterval()</code> | Runs every 1000ms while playing to increment elapsed and update the progress bar. |
| <code>clearInterval()</code> | Stops the progress interval when pausing or loading a new track. |
| <code>loadTrack(idx, autoPlay)</code> | Core function — updates all UI text/art to the given track and optionally starts playback. |
| <code>startPlaying()</code> | Sets playing = true, swaps icon to pause SVG, starts the setInterval ticker. |
| <code>stopPlaying()</code> | Sets playing = false, swaps icon to play SVG, clears the interval. |
| <code>updateProgress()</code> | Calculates percentage elapsed and updates fill width, elapsed time label, and total time label. |

| Element / Pattern | What it does in this code |
|---|--|
| <code>seekTo(e)</code> | Converts mouse X position on the progress bar to a time value and sets elapsed. |
| <code>setVolume(e)</code> | Converts mouse X position on the volume bar to a 0–100 value and updates fill width. |
| <code>fmt(s)</code> | Formats seconds into M:SS string (e.g. 233 → "3:53") for time display labels. |
| <code>showToast(msg, color)</code> | Creates or reuses a floating toast <div>, sets its text, fades it in, and auto-hides after 2.2s. |
| <code>innerHTML</code> | Used to swap SVG icons dynamically — play↔pause, heart outline↔filled, volume↔mute. |
| <code>textContent</code> | Updates song title, artist name, and now-playing header text when a new track loads. |
| <code>style.width</code> | Directly sets progress fill and volume fill widths as percentage strings. |
| <code>style.color</code> | Highlights shuffle/repeat/like buttons green when active. |
| <code>style.opacity</code> | Shows/hides the toast by toggling between '1' and '0'. |
| <code>classList.add/remove('active')</code> | Toggles the active state on sidebar icons and filter pills. |
| <code>e.stopPropagation()</code> | Prevents card-level click from firing when a nested play button is clicked. |
| <code>Math.max() / Math.min()</code> | Clamps seek and volume values to valid ranges (0–duration, 0–100). |
| <code>Math.floor()</code> | Rounds down floating point seek/time values to whole seconds. |
| <code>Math.abs()</code> | Checks if scroll position changed significantly before pushing to history stack. |

| Element / Pattern | What it does in this code |
|---|---|
| <code>% tracks.length</code> | Wraps track index to loop around the array (next from last → first). |
| <code>scrollTo({ behavior: 'smooth' })</code> | Animates the main content scroll for the back/forward navigation buttons. |
| <code>setTimeout()</code> | Delays the toast fade-out by 2200ms after it appears. |
| <code>clearTimeout()</code> | Cancels a pending toast hide if a new toast is triggered before the old one fades. |
| <code>Set.has() / Set.add() / Set.delete()</code> | Checks, adds, and removes track indices from the liked songs set. |
| <code>splice()</code> | Truncates the scroll history array when navigating back then going to a new position. |
| <code>push()</code> | Appends new scroll positions to the navigation history stack. |
| Template literals `` | Used to build the toast HTML string with embedded color spans and track names. |
| <code>const PLAY_SVG, PAUSE_SVG, etc.</code> | String constants holding raw SVG markup for icon swaps, keeping logic clean. |
